

Changes to eTrackr

Old version

New version

The **My Students** menu option on the old version of eTrackr is now called **My Courses** where you can view your classes and the students in them.

The menu option on the new version of eTrackr named **Students** is brand new. It can help you do some things more quickly and easily. See the next page for details...

eTrackr - "Students" page

eTrackr - "Students" page

1. Use the search bar to look up students by name or ID number.
2. Switch between viewing every student on the college system, and every student in your classes.
3. Create dynamic filters to search for students based on things like number of CFCs or attendance rate. You can filter the results to only show your students, hide/show columns, and even stack multiple filters.
4. The export function has been disabled due to GDPR concerns.
5. Save time by applying actions such as attaching an eTrackr note or creating a CFC for multiple selected students at once.
6. Click the arrows to sort the contents of a column (e.g. low to high attendance, surname A to Z).
7. Search for students within your current search/filter parameters.
8. Tick to select multiple students.
9. Student information appears in rows - click on a piece of info to see more detail/options.
